## **MORNING: Strategic and Tactical Air Management for the Fireground**

This dynamic, cutting edge presentation is transforming the way the fire service views air management, tactical safety and firefighter survival. This fast moving workshop utilizes dramatic audio/video, stimulating discussions, and everyday scenarios to create a synergistic learning experience where the students lead, as well as learn.

At the center of the class are: *The Need, The Mandate, and The Solution*. Each area will be covered in detail and students will be provided practical information, along with drills that can be taken back to their departments.

The consistent comment heard from firefighters across the spectrum of experience is: "I wish I'd had this class years ago. I can take this stuff and use it tonight".

## **AFTERNOON: The Art of Go/No Go!**

The toughest and most impactful decisions you make in your career typically revolve around committing to an interior attack or choosing another route. Seasoned officers know the difference between "We can get it" and "It's lost". You should too...

Utilizing a simple framework that allows firefighters to build on experiences, firefighters can develop an intuitive approach that grows throughout a career. This is not a magic class and no one becomes a great decision maker by attending a few classes and watching a few videos. This class will help firefighters remain focused on good decision-making and will teach tools that will allow better reactions to the dynamic fire environment.
